We know that in the market there are several useful tools to carry out backups, and that is why in this opportunity we want to talk about another of the options that the market offers us to carry out such purpose. This tool is called UrBackup, so this time we are going to describe the 3 most relevant features that have made UrBackup to be mentioned in this blog, then we will proceed to give you a brief opinion about what we think about this system. Before we start describing its most important features, first of all, let's define what UrBackup is.

What is UrBackup?

My picture

UrBackup is an easy to configure open source client/server backup system. This system uses a combination of image and file backups to achieve data security and fast restore time. That said, let's move on to the features.

Most relevant features of UrBackup

Speed The backup process of files and images is executed quickly by means of a customized client that takes care of executing the process automatically. Basically, the client continuously monitors the changes in the files.

Ease of configuration Another interesting feature about UrBackup is the ease with which the system can be configured, in fact it is possible to configure the backup server through the web interface, in addition to the fact that the client can be configured from the server, which makes the user interface optional.

Efficient disk space If several clients have the same files, UrBackup takes care of saving them only once, which considerably reduces the disk space used.

Our opinion about UrBackup By way of summary, and after sharing with you these 3 features, we can say that UrBackup is a fantastic tool which brings important benefits to the community in general, which is why we can say that it has earned a mention in this blog on its own merit.

Besides being a fast, easy to configure and multiplatform system, it is also open source, which is undoubtedly one of the best contributions it offers to the community, different functionalities in one place for free and free for all those who wish to use the tool.
