In-House Server

Pros

guarantees.

Cons

support.

How often you take the data offsite will reflect how much data you'll lose in an emergency.
Cloud Server

Pros

recovery could outweigh the benefits for companies that are not as dependent on uptime and instant recovery.

smartphone. If the Internet goes down on your side or on your cloud provider's side, you won't have access to any of your information.

losses in disaster situations. Small data set recovery time is improved.

Cons

Datto is used, recovery can occur in minutes.

availability and cost.

Final Word
